Incident Exercise Program and Report Template

Company	Raízes Soluções e Tecnologia Ltda (CNPJ 51.467.037/0001-65)
Version	1.0
Effective date	03 November 2026
Next review	03 November 2027
Owner	Security and Privacy Officer, contato@raizesolucoes.com.br
Approved by	Management of Raízes Soluções e Tecnologia Ltda

1. Purpose

This program defines how Raízes tests its Incident Response Plan and its Business Continuity and Disaster Recovery Plan, and how the results are recorded and kept on file.

2. Frequency

- At least one exercise per calendar year.
- The first exercise takes place within 90 days of the effective date of this program, that is, by 01 February 2027.
- An additional exercise is held after any high-severity incident or major change of providers.

3. Participants

The Security and Privacy Officer (leader), the Engineering Lead and a representative of management. A deputy takes part when available.

4. Types of exercise

- Tabletop simulation: the team walks through a scenario step by step and decides who does what.
- Technical restoration test: a backup is restored into a separate project, the application is pointed to it and the time taken is compared with the RTO of 24 hours.

5. Scenarios

The scenarios are rotated so that all are covered over time:

- A: an integration access token is exposed in a log.
- B: accidental deletion or corruption of a customer database table.
- C: a provider outage longer than 24 hours.
- D: suspected exposure of personal data, with notification of customers, platform partners and the data protection authority.

6. Procedure

- Prepare: choose the scenario and write the sequence of events to present.
- Run: present the events one at a time, record decisions and the time each step took.
- Measure: compare detection, containment and recovery times with the targets (RTO 24 hours, RPO 24 hours).
- Debrief: within 10 business days, list what worked, findings and corrective actions with an owner and a due date.

7. Records

Each exercise produces a report using the template below. Reports are kept on file for at least 3 years in the company document repository and are available to customers and platform partners on request.

8. Report template

Field	Entry
Exercise date	
Type (tabletop, restoration test or both)	
Scenario (A, B, C or D)	
Participants	
Timeline of key events	
Time to detect, to contain and to recover, compared with RTO and RPO	
What worked	
Findings	
Corrective actions (owner and due date)	
Approved by and date	

9. Exercise log

Year	Date	Scenario and type	Report location
2027	Scheduled by 01 February 2027	To be defined	To be recorded after the exercise
