Security Baseline for Accounts and Workstations

Company	Raízes Soluções e Tecnologia Ltda (CNPJ 51.467.037/0001-65)
Version	1.0
Effective date	03 November 2026
Next review	03 November 2027
Owner	Security and Privacy Officer, contato@raizesolucoes.com.br
Approved by	Management of Raízes Soluções e Tecnologia Ltda

1. Purpose

This baseline defines the minimum security practices for daily operations at Raízes.

2. Passwords

- Passwords have at least 12 characters, are unique for each service and are stored in a password manager.
- Passwords are never shared, written on paper or sent by chat or email.

3. Multi-factor authentication (MFA)

MFA is required on: company email, source code hosting (GitHub), database and cloud consoles (Supabase, Vercel), developer portals of marketplaces and platforms we integrate with, the password manager and any account with administrative privileges.

4. Screen and desk

- The screen locks automatically after at most 10 minutes of inactivity and is locked manually when the user leaves.
- Clean desk and clear screen: no customer data, credentials or notes with secrets left visible.

5. Daily practices

- No shared accounts: every person uses their own identity.
- Credentials, tokens and keys are never pasted in chat, email, tickets or screenshots.
- Public networks are used only with a VPN or mobile data for work involving customer data.
- Suspicious emails and links are reported to contato@raizesolucoes.com.br and not opened.
- Software and system updates are installed promptly.

6. Joiners and leavers

Access for a person who leaves is removed within one business day, and shared secrets they knew are rotated.

7. Review

This baseline is reviewed at least once a year and communicated to all staff.
